NEWS OF INTEREST TO FARMERS — SOIL CONSERVATION — FORESTRY — LIVESTOCK

NEWS OF COUNTY FARM BUREAUS

By Byron Dyer

Plans were made at the Eastern Farm Bureau Tuesday night to check the corn yields in their contest the following Monday. Indications are some of the best yields ever produced in the county will be involved in this contest.

The group voted to have a free supper next time, that is, to be paid for out of the community treasury. Several offered to help prepare it. This will be for September 20.

W. E. Gear, principal of the new high school for the county, called on the county, urged the group to call that their school and to treat it as their own, for that school will be from now on. The school was built for the people in that area and would be operated for them, giving the kind of school program they want. Mr. Gear invited the group to visit the school as often as possible.

W. C. Hodges, county Farm Bureau president, reviewed the plans for membership renewals on August 30 and gave the renewal cards to the Edna group. J. H. Futch, their president, made plans immediately to divide the cards up and get the renewals in.

C. J. Rowe, member of the county ASC committee, outlined in the Neville group on Wednesday night how the new soil conserving crop program would work and asked them to apply for those services, as well as for the feed crop practice. He thought the present plans would be more adaptable to local conditions than practices approved earlier and invited the group to come by the office and change if they had not already taken advantage of the

earlier practice given out last spring.

Mr. Rowe also advised the group that they would still consider applications for storage facilities for grain and peanuts. The ASC committee can procure through CCG 50 per cent of the cost of construction on these buildings. They will also approve loans on the farm in such buildings if they meet specifications.

Raymond G. Hodges and G. J. Martin reviewed the progress on weather modification in the county and advised the group that they were still some short of the plan for this service in the county. Those that would help out were invited to give their checks to Mr. Martin, Mr. Hodges or Gordon Hendrix, the Neville president.

Neville also made plans to renew their membership on August 30. Mr. Hendrix invited several to help divide up the renewal cards and see the group.

The Register Farm Bureau spent all of its meeting Thursday night in lining up for their membership renewal on August 30. L. R. Anderson, president, urged the group to renew on August 30, and brought up his dues to President J. L. Deke. Then, all those present followed Register's suggestion. Cards for those not present were divided up between the serving committee chairman and plans made to see them by August 30.

The American Veterinary Medical Association says there seems to be increased interest in veterinary public health as a career among this year's Veterinary Medicine graduates.

Preventing wildfires in this area and encouraging profitable, well-managed woodlands are two programs, according to Ranger Roberts, which spell better erosion control.

"Erosion's effects," he said, "are highly evident in many areas of our state—muddy rivers swelling up over their banks and hillsides etched deep with ditches. We must prevent erosion's inroads on the top soil of Bulloch County."

The County Forestry Unit head said that nature's chief instruments in erosion control are trees and grasses. Their network of spreading, tangled roots binds loose topsoil, holding it firm against tearing onslaughts of water. The accumulation of litter on the forest floor enriches the soil and helps hold it together.

"Our problem today," he declared, "is to maintain nature's effective bulwark against erosion as we harvest trees and cultivate the grasslands to provide food, clothing and shelter necessary for existence. Science, through development in land and timber management, is proving that man can use the products of forest and field and at the same time control erosion."

Ranger Roberts said the solution from a forestry standpoint, lies in knowing how to harvest and thin woodlands correctly, performing planned, reforestation activities and setting up good fire prevention plans.

A friendly warning makes us all the more eager to take the risk.

Smokey Says:

Acre of forests are annually destroyed by fire—purely by carelessness!

FORESTRY NEWS

By J. W. Roberts, County Forest Ranger Telephone 4-2042

Erosion control begins at the tree roots. J. W. Roberts, Ranger, Bulloch County Forestry Unit, pointed out this week as he emphasized the need for an ever-increasing public interest in prevention of soil erosion in this area.

The Ranger pointed out that erosion control has a direct bearing on the economic prosperity of Bulloch County.

Preventing wildfires in this area and encouraging profitable, well-managed woodlands are two programs, according to Ranger Roberts, which spell better erosion control.

"Erosion's effects," he said, "are highly evident in many areas of our state—muddy rivers swelling up over their banks and hillsides etched deep with ditches. We must prevent erosion's inroads on the top soil of Bulloch County."

The County Forestry Unit head said that nature's chief instruments in erosion control are trees and grasses. Their network of spreading, tangled roots binds loose topsoil, holding it firm against tearing onslaughts of water. The accumulation of litter on the forest floor enriches the soil and helps hold it together.

"Our problem today," he declared, "is to maintain nature's effective bulwark against erosion as we harvest trees and cultivate the grasslands to provide food, clothing and shelter necessary for existence. Science, through development in land and timber management, is proving that man can use the products of forest and field and at the same time control erosion."

Ranger Roberts said the solution from a forestry standpoint, lies in knowing how to harvest and thin woodlands correctly, performing planned, reforestation activities and setting up good fire prevention plans.

A friendly warning makes us all the more eager to take the risk.

SHOULD GET THE LOAN PRICE

Farmers Urged To Hold Cotton If Price Drops Below Support Price

H. L. Wingate, Georgia Farm Bureau President, in releasing a prepared statement August 16, advised farmers not to take less than the loan price for their 1955 cotton crop.

The Farm Bureau leader's advice may spark a withstanding movement across the cotton belt as the 1955 marketing season gets underway.

Wingate explained, "Farmers should realize that the buyer will have to either pay the premium loan price on the 1955 crop or report to purchase for their 1955 cotton now in government loan."

He noted that before purchase of old crop cotton can be had, essentially, buyers must pay for that cotton at the rate of 105 per cent of the loan price, plus storage charges, handling charges, and interest on those charges.

"Farmers should not be misled into believing there is not a tight supply situation on cotton," he added. "In our opinion, the demand for domestic and export purposes will consume the entire crop."

Farm Bureau officials explained that the minimum support price for white cotton is 35.24 cents per pound while cotton 1 1/2 inch or longer in staple length is 36.43 cents per pound or 1 1/16 inch middling white or extra white ranges from 36.43 to 36.43 cents per pound depending upon the point of location.

Wingate predicted that the 1955 Georgia cotton crop would average from 90 to 96 per cent measuring 1 1/4 inch or greater in staple length. In 1953, over 95 per cent of Georgia's cotton measured 1 1/4 inch or longer in staple length.

Last year, 97.9 per cent of the state's cotton measured 1 1/4 inch or longer in staple length. With dry weather in 1954, cotton staple length was slightly shorter. Adequate rainfall for the new crop is expected to result in longer staple length.

Even in 1954 88.3 per cent of the cotton in North Georgia was 1 1/4 inch or above in staple. With the severe drought in South Georgia, 94 per cent of the crop measured 1 1/4 inch or greater in staple length.

Jim Collier, Ben Hill County Agent, reported, "I haven't seen any cotton here under 1 1/4 inch this year. I predict 95 per cent of our cotton will run 1 1/4 inch or above, with 50 per cent going at least 1 1/2 inch."

Farm Bureau officials noted less than 2 per cent of the cotton produced in Georgia in 1954 was less than 1 1/16 inch. "This means Georgia farmers grow premium cotton and, subsequently must receive the premium price by placing their cotton in the loan if the market price falls to or below the effective loan price," Wingate explained.

Local Students Are Awarded Degrees

George Peabody College for Teachers, Nashville, Tenn., awarded degrees to approximately 600 members of the 1955 August graduation classes at the College's 167th commencement exercises, Monday night, August 15.

Dr. Henry H. Hill, president of Peabody College, introduced the commencement speaker, the honorable Frank G. Clement, Governor, State of Tennessee.

Among those receiving degrees were: Miss Genevieve Guardia, M.A., and John T. Groover, M.A., of Statesboro and James Aubrey Wynn, M.A., of Brooklet, Georgia.

Europe has a greater density of population per square mile than any other continent. It has more than three times as many persons per square mile than the United States, so states the World Book Encyclopedia.

A pleasant disposition gets one into all kind of complications.

SOIL AND WATER CONSERVATION

By E. T. ("Red") Mullis Soil Conservation Service

Now is a good time to soil those dams, spillways, and entrance ways of water ponds. Co-operators of the Ogeechee River Soil Conservation District have tried several ways and have found that the most fool-proof method is by placing them at the tender mercy of a few older, left-over fish. Help us to help you get better fishing from your pond by keeping out all other fish.

Mr. Sam Franklin and Mr. Prince Preston have done a fine job of solving their dam and entrance ways of water into their pond on their farm north of Statesboro on U. S. 301. They use iron and coastal bermuda to do the job, and a fine job they are doing. Even though there has not

been enough rain to fill the pond, they have done the right thing in preparing for the rains which are sure to come.

Those ponds expecting A.C.P. payment will necessarily have to be stocked before payment can be made.

Mr. Leon Newsome, ot Ogeechee way, is doing the right thing about his pond management for fish production. He has turned the water off, fished it and killed the remaining fish with rotenone. He failed to kill the remaining fish before when he fished it and learned a lesson the hard way. Small catfish took over the pond in spite of efforts to stock with trout and trout. This time when his hatching fish come, they will have smooth sailing without interference from wild fish.

Mr. Newsome has learned what many others are learning in fish pond management, mainly, that it is better to stock your pond properly and with the right kind and amount of fish. I have heard of other people leaving a few large trout or broom in their ponds and then stocking with hatchery fish. They too will learn that it doesn't pay, especially with trout. One or two large trout can consume a full stocking of hatchery fish in a few pleasant meals. They are! We are expecting to get several ponds stocked with broom and trout this fall and next spring.

We are expecting to get several ponds stocked with broom and trout this fall and next spring. Mr. T. J. Morris of Brooklet has the most fool-proof method. He went into a field with a soil of coastal bermuda and skimmed off soil, topsoil and all and transported onto the dam with a scoop. NOTICE

TO THE PEOPLE OF BULLOCH COUNTY:

We, the undersigned, have had a cloud seeding project going on since the 2nd day of April, 1955. We have had sufficient rain to grow a bountiful crop, for which we are very proud. This project cost 2 cents per acre, or \$7,860.00, which is very small for the county. We like \$2,000.00 having this money. We are discussing this at each Farm Bureau Chapter, and are getting some money. We hope those that favor the project will make their contribution, as the \$2,000 is heavy for a few, but is so light for so many.

Respectfully, C. J. MARTIN, A. R. CLARK, JOHN RUSHING, JR., RAYMOND HODGES.

P. S. You can make contributions to either of our banks in Statesboro, Bank of Brooklet, our Farm Bureau President, Byron Dyer or the board members.

Get on the BEST BUY

Now's the time to join the thousands who are swinging over to Ford... the car that sells more because it's worth more!

We're celebrating what promises to be Ford's greatest sales year by making money-saving Leadership Deals during our Summer Bandwagon Sell-A-bration.

Drive your car in for a trade-in appraisal. That will take just a few minutes of your time... and there's absolutely no obligation on your part!

When you hear how easy we can make it for you to own a beautiful new Ford... we believe you'll agree that this is the finest time ever to start enjoying the fine car of its field... the distinctive 56 FORD!

GEORGIA BANKS AND FARMERS

Credit Needs Are Met By Local Institutions; Repayment Rapid

Georgia farmers met their credit needs during 1954 chiefly by loans from their local banks, according to W. G. Cobb, President, Bulloch County Bank, which represents the Georgia Bankers Association as Bulloch County Key Banker. Georgia banks remained the largest source to the state's farmers during this year, providing far more credit aid to our farmers than any other lending agency, he said.

Quoting from the fourteenth annual farm lending survey of the Agricultural Commission of the American Bankers Association, Cobb stated that during January 1955, Georgia banks had loans outstanding to farmers totaling \$719,000 including both production and mortgage loans. This compares with a total of \$29,000 in 1940. The survey also showed that Georgia banks held \$42,800 in C.C.C. loans under the warrent's price support program not included in the above figures.

Despite reduced net income of continued high production expenses on farms," Mr. Cobb said, "payment of loans is rapid, and farm assets are at near-record levels, indicating that these factors are not in any sense weakened a financial soundness of agriculture. Bank loans play an important part in maintaining the financial position by putting our farmers to make use of the latest equipment and modern production and marketing methods, resulting in greater efficiency."

"Something NEW Has Been Added To Famous Mutual of Omaha Health Insurance!"

RENEWAL SAFEGUARD

This means that your policy cannot be cancelled or non-renewed regardless of

change in health or number of times you receive benefits up to age 65.

YOU GET RENEWAL SAFEGUARD WITH MUTUAL OF OMAHA'S BROAD NEW:

HOSPITALIZATION

FOR UP TO 500 DAYS AT \$5 TO \$15 A DAY . . . when you or any member of your family are hospitalized by covered sickness or accident. Pays maternity benefits on family plan. Pays cash for covered hospital "extras."

LIFETIME INCOME PROTECTION

\$50 TO \$300 A MONTH, EVEN FOR LIFE. Pays cash direct to you for one day or more, even for life, when you are unable to work because of covered confining sickness or disabling accident. Pays this cash in addition to benefits received from your hospitalization. No age reduction clause!

SURGICAL INCOME

PAYS FROM \$7.50 TO \$375.00 direct to you on a liberal schedule of benefits based on the nature of operation and is paid regardless of where surgery is performed. Even covers dislocation and fractures.

CHOOSE YOUR MOST CONVENIENT PAYMENT PLAN

- Monthly
- Quarterly
- Semi-annually
- Annually

Pay for your low-cost Mutual of Omaha health insurance as easily as you pay your light bill. Use the new monthly premium payment plan if you like. Choose the payment plan that is most convenient for you.

KNOW THE FAMOUS COMPANY THAT INSURES YOU

Satisfied policyowners—millions of them—have made Mutual of Omaha the LARGEST exclusive health and accident company in the world. They know that Mutual of Omaha protection PAYS.

Each week Mutual of Omaha pays out an average of over \$1,400,000 in benefits. To date, the Mutual of Omaha has paid well over \$650,000,000 in benefits. More than twenty million dollars paid to Georgia policyowners.

YOU CAN HAVE ALL OR ANY PART OF THIS INSURANCE TO FIT YOUR NEEDS

Get full information and see if you qualify for Mutual of Omaha's broad new coverage. Select any or all, to fit your needs. You'll find your Mutual of Omaha policy clearly states conditions of coverage. For example: You are covered for accidents occurring immediately after policy date; for covered sicknesses originating 30 days after the policy date; for such sicknesses resulting in surgery (hospital-surgical benefits are paid if operation is performed more than 90 days after the policy date). Covers hernia, female trouble, heart trouble originating only 90 days from policy date. The ONLY sicknesses or accidents not included are insanity, mental disorders, non-commercial air travel, war, and military service! Find out now about the PRACTICAL cost of this BROAD coverage with its RENEWAL SAFEGUARD.

BEN FRANKLIN STORE TO OPEN

Thursday, September 1st
Self-Service Variety Store
To Hold Opening Here

It was announced this week that on Thursday, September 1st, the Minkwitz brothers will open a new Ben Franklin Variety Store here in Statesboro, Georgia, at 16 East Main Street, right next door to Franklin Drug Co. This new store will be operating under the franchise arrangement with Butler Brothers, national distributors of merchandise who are the largest distributors of Variety Store merchandise in the world.

Harold Jones will be the manager of the new Ben Franklin Store. Mr. Jones, formerly zone Superintendent in Georgia for Butler Brothers, recently resigned to take over management of the Ben Franklin Store. He started in the Variety Store business during World War II in Asheville, N. C. with one of the leading chain organizations. Later he worked in Atlanta, Georgia, Columbus, Georgia, Pensacola, Florida and in Kentucky and North Carolina before going with Butler Brothers in 1952. Mr. Jones and his wife, Mary and two children live on Ridge-wood Drive in Statesboro.

The new Ben Franklin Store will be one of a group of over 2500

HAROLD JONES, Manager

Top feature of the new Ben Franklin Store in Statesboro will be Self-Service. Mr. Jones announces, in keeping with the growing trend, many home-owned Ben Franklin Stores have gone "Self-Service" because folks have proved that they prefer to shop this way, and Mr. Jones feels that the Self-Service system in his store will contribute much in the way of shopping satisfaction.

All departments in the store will be equipped with the newest and most modern Self-Service fixtures, all of which are designed to add to the ease and convenience of shopping. Counters will be com-

GRAND OPENING

Thursday, Sept. 1st--9:00 A. M.

READY—A BRAND NEW STORE

to make your shopping easier because it's located in your community — handier to shop in because it's a "Self-Service" Store with all the merchandise right out where you can see it, every item plainly marked—and, best of all, value priced!

SHOP THE WAY YOU LIKE TO SHOP — SELF SERVICE

We know you'll enjoy browsing through our "super market" variety store, examining the items in each well-arranged department at your leisure, selecting the items you need. Of course, our department managers will be ready to answer any questions.

AN "OVER-ARM" SHOPPING BASKET

Use one of the handy, lightweight shopping baskets which are provided for your convenience. You'll find it just right for carrying your purchases as you go from counter to counter. The cashier at the check-out counter will unload your basket and record your purchases as you leave the store.

BEN FRANKLIN IS A VALUE STORE

You'll find hundreds of items to fill your every day needs on display in this new and modern store—and you'll find hundreds of values every time you come to shop!

Come In—Get Acquainted
—And Save!

COME TO THE GRAND OPENING!!
COME ANY DAY—MAKE THIS YOUR STORE

BULLOCH TIMES AND STATESBORO NEWS

BROOKLET NEWS

MRS. J. C. PROCTOR

Mr. and Mrs. Lester Bland and Mr. and Mrs. John Rushing, Sr. spent the past week end in Beaufort, S. C.

Mr. and Mrs. Waldo Moore and family are spending a few days at Daytona Beach, Fla.

Mr. and Mrs. Charles Powell of Umatilla, Ga., joined Mr. and Mrs. Wayne Sweeney and family of Tacoma, Wash., in a visit with their parents, Mr. and Mrs. John C. Proctor.

Mrs. Lester Bland, Mrs. John Rushing, Sr., and Mrs. Kirk Bland spent Thursday with Mrs. Fred T. Lanier of Statesboro.

Mrs. John A. Robertson is spending several days with her sisters in Gray and Atlanta, Ga.

Mr. and Mrs. William Cromley, Jr., spent several days at Daytona Beach, Fla.

Mr. and Mrs. Henry Cottle and children of Savannah spent Sunday with Mr. and Mrs. John Rushing, Sr.

Mr. and Mrs. T. R. Bryan spent Sunday with Mr. and Mrs. Thomas R. Bryan of Savannah.

Mr. and Mrs. Lannie Simmons of Statesboro, Mr. and Mrs. Walter E. Hatcher, Jr., of Savannah,

in addition to the complete program of merchandise and operating assistance rendered by Butler Brothers, Mr. Jones will have the continuous advice of Butler's trained Variety Store Counsellors. This will enable the Ben Franklin Store to keep abreast of the latest trends in Variety Store operation. He wants everybody to feel at home in his store. He cordially invites shoppers to come in and look around to their heart's content, meet their friends, and stay as long as they like.

As no shopping trip is considered complete without a trip to the Variety Store, your new Ben Franklin Self-Service Store will fill a long-felt need in this community, and the residents of Statesboro and outlying communities extend Mr. Jones a welcome and best wishes for success.

ESTABLISHED 1892

MANY POLIO SHOTS PLANNED

To Children and Expectant Mothers of the State

(W. D. Lundquist, M.D., M.P.H., Director of Public Health, Bulloch Health District)

Georgia's plans are under way for administration of enough polio vaccine to give first and second shots to about 480,000 children and expectant mothers.

The state will receive an allotment from the U. S. Public Health Service under the Polio-vaccine Vaccination Assistance Act recently signed by the President, which provides \$30,000,000 for the purchase by the federal government or state governments of all vaccine produced before February 15, 1956. The value of Georgia's share will be \$992,329 with additional funds for carrying out the vaccination program. When the vaccine is received, said Dr. Thomas F. Sellers, Director of the Georgia Department of Public Health, it will be distributed to the state's 159 counties through county health departments, or through regional offices of the Georgia Health Department. It will then go to health department clinics and to private physicians.

Each community with its local health department, the local medical society, and other interested persons will make plans for the distribution and use of this vaccine within each county.

Dr. Sellers said he estimates that about half the vaccine will be administered by local health departments and about half by private physicians. No charge will be made for the vaccine, but physicians may charge a fee for administering it.

The first shipment, Dr. Sellers said, will consist of about one-third of the amount required to give the first injection to every eligible group. Other amounts will come later as long as the funds for purchase permit. The vaccine will be restricted to children ages one through nine and to expectant mothers before the eighth month of pregnancy. Children ages five through nine will receive the vaccine first, followed by those ages one through four.

The distribution plans were based upon recommendations of the Georgia State Advisory Committee, representing the Medical Association of Georgia, the Georgia Academy of General Practice, the Georgia Pediatric Society, the Georgia Pharmaceutical Association, and the Georgia Department of Public Health.

The committee recommended that there be no distribution of the vaccine before October. The Health Department plans to begin the program in October immediately after the mass clinic are held for about 75,000 first and second graders who have not received their vaccine as provided by the National Polio Foundation.

Dr. Sellers has urged all health departments and physicians to keep records of the administration of the vaccine, including the name, age, sex, race, address and brand of vaccine. This information will be used as permanent records of the program and as the basis for distribution of the vaccine.

REVIVAL AT CORINTH

Revival services will begin at Corinth Church Sunday, Sept. 4, at 11:30 a. m. and 7:30 p. m. Services will continue through Friday night. Rev. E. L. Harrison will be the preacher. The public is invited to attend the services.

Kindergarten Teacher

Miss Isabelle Elizabeth Cabanis of Moxey, a native of Athens and J. D. Anderson, the director of Georgia, joins the Georgia Teachers College faculty in September as kindergarten teacher in the Marvin Pittman School.

The announcement of the appointment of Miss Cabanis, who succeeds Mrs. Mary Owen Bruce, was made by President Zach S. Henderson, head of the school at the end of last school year to continue her graduate studies.

All teachers in the Marvin Pittman School, formerly called the Laboratory School, are officially members of the Georgia Teachers' College faculty. J. A. Pafford is principal of the school which serves as a practice teaching center for the College's teacher training program.

To Children and Expectant Mothers of the State

(W. D. Lundquist, M.D., M.P.H., Director of Public Health, Bulloch Health District)

Georgia's plans are under way for administration of enough polio vaccine to give first and second shots to about 480,000 children and expectant mothers.

The state will receive an allotment from the U. S. Public Health Service under the Polio-vaccine Vaccination Assistance Act recently signed by the President, which provides \$30,000,000 for the purchase by the federal government or state governments of all vaccine produced before February 15, 1956. The value of Georgia's share will be \$992,329 with additional funds for carrying out the vaccination program. When the vaccine is received, said Dr. Thomas F. Sellers, Director of the Georgia Department of Public Health, it will be distributed to the state's 159 counties through county health departments, or through regional offices of the Georgia Health Department. It will then go to health department clinics and to private physicians.

Each community with its local health department, the local medical society, and other interested persons will make plans for the distribution and use of this vaccine within each county.

Dr. Sellers said he estimates that about half the vaccine will be administered by local health departments and about half by private physicians. No charge will be made for the vaccine, but physicians may charge a fee for administering it.

The first shipment, Dr. Sellers said, will consist of about one-third of the amount required to give the first injection to every eligible group. Other amounts will come later as long as the funds for purchase permit. The vaccine will be restricted to children ages one through nine and to expectant mothers before the eighth month of pregnancy. Children ages five through nine will receive the vaccine first, followed by those ages one through four.

The distribution plans were based upon recommendations of the Georgia State Advisory Committee, representing the Medical Association of Georgia, the Georgia Academy of General Practice, the Georgia Pediatric Society, the Georgia Pharmaceutical Association, and the Georgia Department of Public Health.

The committee recommended that there be no distribution of the vaccine before October. The Health Department plans to begin the program in October immediately after the mass clinic are held for about 75,000 first and second graders who have not received their vaccine as provided by the National Polio Foundation.

Dr. Sellers has urged all health departments and physicians to keep records of the administration of the vaccine, including the name, age, sex, race, address and brand of vaccine. This information will be used as permanent records of the program and as the basis for distribution of the vaccine.

REVIVAL AT CORINTH

Revival services will begin at Corinth Church Sunday, Sept. 4, at 11:30 a. m. and 7:30 p. m. Services will continue through Friday night. Rev. E. L. Harrison will be the preacher. The public is invited to attend the services.

Kindergarten Teacher

Miss Isabelle Elizabeth Cabanis of Moxey, a native of Athens and J. D. Anderson, the director of Georgia, joins the Georgia Teachers College faculty in September as kindergarten teacher in the Marvin Pittman School.

The announcement of the appointment of Miss Cabanis, who succeeds Mrs. Mary Owen Bruce, was made by President Zach S. Henderson, head of the school at the end of last school year to continue her graduate studies.

All teachers in the Marvin Pittman School, formerly called the Laboratory School, are officially members of the Georgia Teachers' College faculty. J. A. Pafford is principal of the school which serves as a practice teaching center for the College's teacher training program.
